Contributed to front-end development by modifying the UI design with help of React and tailwind css

Maintained positive client relationships through clear communication, actively listening to feedback, and incorporating revisions effectively

PERSONAL PROJECTS

React Blog using AppWrite | React, Aapwrite.

Developed a user-friendly blog application using Appwrite, enabling features such as:

Intuitive Blog Creation and Management: Streamlined user experience for creating, editing, and deleting blog posts within the Appwrite database.

Secure User Authentication: Implemented password recovery and email verification mechanisms using Appwrite to ensure secure user accounts.

Express vitetube_API_backendWork | Express , MongoDB , Postman – testing

User authentication and management (including routes for registration, login, and profile management)

Video upload and management (including efficient handling of parameters for video data)

User interaction features (comments, likes/dislikes) to foster user engagement

Playlist and watchlist creation and management for personalized video experiences

Robust API testing using Postman to ensure a seamless and user-friendly platform
